SDEA Label Registration Form

Legal Notice

Your personal data will be used for processing your application and providing the required services. We will never sell it or share it for commercial purposes. For more information on our processing activities of personal data, please refer to our website privacy notice. The SDEA Label and KPI Tool are protected by intellectual property rights owned by the SDEA Association. Their use is subject to authorization from us, which may be revoked. By signing this document, you agree to (i) use the SDEA Label only if and as expressly authorized by us for a maximum period of six months, (ii) keep the SDEA KPI tool confidential, and use it exclusively for your company's internal needs relevant to this certification application, and (iii) comply with any additional restriction that may be specified to you for their use.

Date, place and signature:

-
- ¹ In this case, either a single owner owns both the DC and IT Infrastructure for the Instance, or the owner of IT Infrastructure uses DC Infrastructure provided by the owner of the hosting datacenter campus. In the former case, the entire DC Instance will be certified with SDEA Label. In the latter case, the DC Infrastructure should be separately certified prior to an application for SDEA Label for a DC Instance with IT Infrastructure.
 - ² In this case, the owner can provide DC Infrastructure for others to host their DC Instances. To be able to advertise the efficiency of the DC Infrastructure, in this scenario the owner can apply for SDEA Label for its DC Infrastructure alone calculated with nominal KPIs for IT Infrastructure.
 - ³ In this case, an IT Infrastructure owner can apply for SDEA Label if hosted by an already certified SDEA DC Infrastructure host. The SDEA reference number for the host's certified DC Infrastructure must be specified in the registration.
